School Year: 2018-2019

Dear Parents and/or Guardians,
RE: Freshgrade - Data and Online Portfolio Permission

Once again, this coming school year, OLPH School will be using Freshgrade as an Educational tool to better serve the needs of our parents and students. It is a gateway for parents to see in real time the ongoing progress of their child's educational journey at OLPH.

As Freshgrade is a method of collecting and documenting evidence of student learning, we will be taking photographs, videos and audio clips of your child throughout the school year. This data will be used by teachers as evidence of learning and will be stored in a secure online portfolio, which will only be accessed by the parents of that child.

During the school year, there are occasions where evidence of student learning will include partners, small and large group work. This work may be relevant to your child's portfolio and the teacher may choose to document this through photographs, videos or audio clips. Photographs/videos of your child engaged in partner/group work may appear on another child's portfolio which may then be shared with another child's family. Teachers have a duty and a responsibility to be mindful of the images they share with other families. We are committed to being respectful with what we choose to post. This data belongs to you and your child and you may request to have it removed at any time. Anything posted to the shared portfolios must never be copied or shared by the viewing families.

I hereby authorize Our Lady of Perpetual Help School to allow photos/videos involving my child to be posted to his/her online portfolio as well as classmates online portfolios (please circle yes or no): [Yes] [No]
